Agriculture

ARE FUTURE FARMERS FLYING FARMERS? USE OF ROBOTS, DRONES, AND SATELLITES IN AGRICULTURE

ABOUT THE WORKSHOP

Today's **agriculture** has transformed into a **high-tech enterprise** that most 20th-century farmers might barely recognize. Self-driving machinery and flying robots able to automatically survey and treat crops will become common place on farms that practice what's come to be called precision agriculture. The ultimate purpose of all this high-tech gadgetry is optimization, from both an economic and an environmental standpoint. This thematic workshop will point out and showcase different solutions that are on the market, ready to be used by farmers worldwide.

TOPICS TO BE COVERED

- Smart use of robots and drones
- Satellite data in support of cultivation
